

ATTACHMENT TYPES BLOCKED

As a preventive measure, certain file types are not allowed in NIC messaging services.

Mails sent with attachments having the following extensions will be dropped at the gateway.

`vbs|base|exe|pif|tmp|url|vb|vbe|scr|reg|cer|pst|cmd|com|bat|dll|dat|hlp|
app|bas|csh|hta|inf|js|jse|ksh|lnk|mau|mda|mdb|msc|msh1|msh2|mshtml|
msh1xml|msh2xml|msi|msp|scf|ws|wsc|wsf|jar|ocx|cla|class|ps1|ps2|ps1xml|
ps2xml|psc1|psc2|tmp`

These file types are not allowed within a **ZIP folder** either.
